MEMORANDUM FOR All Drivers

SUBJECT: Garrison Commander's Policy Memorandum No. 63 - No Idling

1. Purpose: To provide guidelines for the operation of mission essential vehicles, mission support vehicles, services vehicles, delivery vehicles, and freight carriers to follow while operating on Fort Gordon property. This policy is being implemented in an effort to:

- Reduce unnecessary vehicle idling
- Protect the health of our workforce and visitors from harmful emissions
- Improve air quality
- Reduce wasted fuel
- Reduce excess engine wear

2. It is the driver's responsibility for their vehicle, and to assist in the reduction of the amount of time a vehicle idles unnecessarily. Vehicles must be turned off when parked and should not be restarted until loading or unloading is complete and the vehicle is ready to depart.

Exceptions to this policy are listed below:

- Trailer engines used for the purpose of controlling freight temperature
- Emergency vehicles
- Vehicles powered by natural gas
- Electric vehicles

3. Vehicles will be monitored for compliance and all drivers are encouraged to ensure full compliance with this policy. The health and well-being of our employees and visitors are of vital concern. Exhaust fumes from idling vehicles pose an unnecessary health risk to our employees, drivers, and the community at large. Reducing vehicle idling reduces air pollution and conserves fuel.

4. Proponent for this action is the Directorate of Logistics at commercial 706-791-2675 or (DSN: 780).

GLENN A. KENNEDY, II
COL, SC
Commanding
